

Codebook for 1999 Deliberative Poll on Australia Deliberates: A Republic Yes or No

Overview:

A nationally representative random sample of 356 Australian voters were assembled over the weekend of October 22-24, 1999, in Old Parliament House in Canberra to discuss the issues involved in the referendum in Australia's first Deliberative Poll (DP).

Participants attending the Australia Deliberates were first interviewed in early September, 1999, about six weeks prior to the deliberations. The initial interview sample consisted of 1220 respondents. Those 356 attending the Deliberative Poll were polled at the end of the weekend, following wide-ranging discussions in small-group sessions and questioning of experts from all sides of the debate.

The event was organized by Issues Deliberation Australia, in collaboration with the Research School of Social Sciences at the Australian National University, and in consultation with the Centers for Deliberative Polling and Australian Studies at the University of Texas at Austin.

In addition to the DP, the Australian National Election Studies put out a survey shortly after the DP called the "Australian Constitutional Referendum Study". It asks many of the same questions as the DP questionnaire, along with additional questions. It's main sample is simply a random sample of Australians. However, the study also re-interviews two groups of respondents from the DP. It re-interviews 316 of the respondents who attended the DP and 228 T1 respondents who did not. *(Note: these statistics were updated on 13 July, 2000. See more detailed note below.)*

T1 refers to respondents who participated in the pre-weekend interview questionnaire. T2 refers to respondents who completed the self-completion questionnaire after participating in the Deliberate Poll in Canberra. T3 refers to respondents who completed the self-completion questionnaire titled "Australian Constitutional Referendum Study" after the referendum was held.

Pre-weekend interview questionnaire variables prefixed by Q
Post-weekend self-completion questionnaire variables prefixed by W
Post-referendum self-completion questionnaire variables prefixed by Z

The codebook contains responses to questions from T1, T2, and T3 of ONLY those who participated in the Deliberative Poll weekend in Canberra. (The dataset, however, includes all valid responses, regardless of T2 participation. Also see note below) The format is as follows:

Example: PREZPOW1, PREZPOW2, PREZPOW3 President no more powerful than Governor General: THE PRESIDENT WOULD BE NO MORE POWERFUL THAN THE GOVERNOR GENERAL IS NOW - PREZPOW1, PREZPOW2, PREZPOW3 refers to the variable names corresponding to the question at T1, T2, and T3. The variable names are followed by the variable description and the question as it appears on the T1 questionnaire. The frequencies for each time period follow, with the variable name, time period, and question number (as it appears in the questionnaire) preceding the frequencies.

The variables are also identified by variable number for easy identification. For example, PREZPOW1, PREZPOW2, PREZPOW3 are identified as v044, and this notation will appear before the question in the codebook. Variables that represent the same question at T1, T2, and T3 are coded under the same variable number.

NOTE: The frequencies listed in this codebook were revised in September, 2000 because of corrections made to T3 respondent id numbers and the variable called "sample." There were also changes to the number of T2 participants. Nine additional T2 participants were located who did not turn in their completed questionnaires. For more information about T2 revisions, see the explanation located at /poll96/oz/oz_data/files.txt. For T3, frequencies were revised because of 4 respondents who were originally coded as "re-interviewed non-participants" but were actually participants (case id numbers: 4; 57; 344; and 419). Additionally, several respondents initially coded as "re-interviewed participants" were re-coded to match with their actual status as "re-interviewed non-participants." These respondents were mis-classified because Newspoll was mistakenly given a list of 'likely participants' instead of actual participants for conducting the ACRS. For more information about T3 revisions, see the explanation located at /poll96/oz/MasterData/ACRS_t3/files.txt.

NOTE: According to David Briggs, typically the Labour Party has been more supportive of Australia becoming a republic but in the referendum neither party imposed a party line. Of note, however, is that Liberal Prime Minister John Howard was against the republic while the leader of the Labour Party was in favor.
