

UK EU

- *EU Scope*
 - How much do you agree or disagree with each of the following statements? The EU countries should be more than just a trading bloc - their governments should make joint decisions on other things too. – Disagree strongly, Disagree, Neither Agree Not Disagree, Agree, Agree Strongly
 - How much do you agree or disagree with each of the following statements? Passport controls in EU should be removed: Passport controls within the EU should be removed altogether. – Disagree strongly, Disagree, Neither Agree Not Disagree, Agree, Agree Strongly
- *Relations with EU*
 - Firstly, a few questions about Britain's relationship with the European Union (sometimes referred to as the European Community). As a member state, would you say that Britain's relationship with the European Union should be . . . Much less close, A little less close, About right, A little closer, Much closer.
 - Which of the following do you think Britain's long-term policy should be? – Britain should leave the European Union (EU), Britain should stay in the EU and try to reduce the EU's powers, Things should be left as they are, Britain should stay in the EU and try to increase the EU's powers, Britain should stay in the EU and work towards the formation of a single European government
 - Please tick one box to show which comes closest to your view about the following statement? Britain should do all it can to unite fully with the European Union. – Definitely not, Probably not, Not sure, Probably, Definitely
- *EU should include some Eastern European countries*
 - How much do you agree or disagree with each of the following statements? The European Union should expand its membership to include some of the ex-Communist countries of Eastern Europe. – Disagree strongly, Disagree, Neither Agree Not Disagree, Agree, Agree Strongly
- *Favor Referendum*
 - How much are you in favour or against having a referendum where the British public would vote on whether or not Britain should strengthen its links with the European Union? – Strongly against, Against, CC/Neither in favour, In favour, Strongly in favour

UK Crime

Number of Indices: 5

- *Punishment*

- Punishment vs. reform: If the government had to choose between reforming criminals and punishing them, should it definitely reform, probably reform, definitely punish, probably punish, or does it not matter either way?
- Prisons reform, not just punish: And now, here are some ideas about sending people to prison. How much do you agree or disagree with each one? Prisons should try harder to reform prisoners, rather than just punishing them – Strongly disagree, Disagree, Neutral, Agree, Strongly Agree
- Tougher sentences: And now, here are some ideas about sending people to prison. How much do you agree or disagree with each one? Courts should give tougher sentences to criminals – Strongly disagree, Disagree, Neutral, Agree, Strongly Agree
- Stiffer sentences generally: Here are some ideas for helping to prevent crime in Britain. Please tick one box for each idea to show how effective you think it is as a way of cutting crime.
 Tick the box in the first column if you feel that stiffer sentences and more prisons would be the most effective way of reducing crime.
 Tick the box in the second column if you feel that stiffer sentences and more prisons would be the second most effective way of reducing crime.
 Tick the box in the third column if you feel that stiffer sentences and more prisons would be the third most effective way of reducing crime.
- More offenders to prison:
- Fewer people to prison: And now, here are some ideas about sending people to prison. How much do you agree or disagree with each one? The courts should send fewer people to prison – Strongly disagree, Disagree, Neutral, Agree, Strongly Agree
- Only dangerous criminals to prison: And now, here are some ideas about sending people to prison. How much do you agree or disagree with each one? Only hardened criminals, or those who are a danger to society, should be sent to prison – Strongly disagree, Disagree, Neutral, Agree, Strongly Agree
- More offenders out of prison:
- More offenders: community serv. :
- More offenders: military serv. :
- More offenders get training:
- Prison life tougher: And now, here are some ideas about sending people to prison. How much do you agree or disagree with each one? Prison life should be made tougher and more unpleasant – Strongly disagree, Disagree, Neutral, Agree, Strongly Agree
- All murderers life sentence: And now, here are some ideas about sending people to prison. How much do you agree or disagree with each one? All murderers should be given a life sentence – Strongly disagree, Disagree, Neutral, Agree, Strongly Agree
- Life sentence means life: And now, here are some ideas about sending people to prison. How much do you agree or disagree with each one? Life sentences should mean life – Strongly disagree, Disagree, Neutral, Agree, Strongly Agree

- Death most approp. for some crimes:
- *Social Root Causes*
 - Spend more time with children
 - Reduce TV violence and crime
 - Firmer school discipline
- *Police*
 - More police on the beat
 - Off-duty police carry guns
- *Procedural Rights*
 - Convict innoc. vs. not punish guilty
 - Police allowed to bend rules
 - Fewer jury trials
 - Court rules less on side accused
 - End presumption of innocence
 - Silence mentionable in court
 - Right to silence in police questioning
 - Confessions alone not convict
- *Self-Protection*
 - People make property more secure
 - More Neighborhood Watch schemes
 - Street patrols vs. police

NIC 2

Number of Indices: 9

- *Protecting the Environment*
This pre-averages two items asking whether the respondent supports or opposes “requiring higher mileage from automobiles even if that means less powerful automobile engines” and “requiring cleaner production of electricity, even if that means higher electricity rates” as ways of reducing greenhouse gases, then averages that with items asking what priority, on a scale from 0 to 10, should be accorded “protecting the global environment” as “as a long range foreign policy goal” and to what extent “global warming is not really a problem so there is no need to do anything about it” versus “a serious problem [about which] we need to act now (both initially on 0 to 10 scales).[i] Cronbach’s alpha is .78 face-to-face and .73 online. // [i]Here as in a number of other cases, we “pre-average” subsets of items reflecting side attitudes, prior to averaging the whole set. In the present case, one might want to reduce greenhouse gases but oppose higher mileage from automobiles even if that means less powerful automobile engines” and “requiring cleaner production of electricity, even if that means higher electricity rates” as a way of doing so. We do better, if the object is gauge the attitude toward reducing greenhouse gasses, to average across the asked-about ways of doing so. The indices constructed without pre-averaging these items cohere less well.
- *Fighting Terrorism*
This index pre-averages four items asking how much importance should the U.S. place on “encouraging more democracy in Middle East countries like Egypt and Saudi Arabia,” “increased foreign aid to countries that may be breeding grounds for terrorism,” “working with other countries to identify and combat terrorism,” and “building up our intelligence capabilities” as “ways of reducing future terrorism directed against the U.S.” The remaining ingredients are items asking what priority, again on a scale from 0 to 10, should be accorded “preventing the spread of weapons of mass destruction,” “fighting terrorism,” and “protecting the U.S. from attack” as “long range foreign policy goal[s]”

and to “discouraging countries from trying to develop nuclear weapons” as a reason for “provid[ing] foreign aid to other countries.” Cronbach’s alpha is .82 face-to-face and .83 online.

- *Increasing Foreign Aid*

[Single Item] This is a single item asking whether “the amount of money the U.S. is now devoting to foreign aid should be increased, reduced, or kept about the same.” Some of the items in the next index may also be thought relevant, but empirically this item, with its explicit reference to spending and silence about purposes, stands apart.

- *Internationalism*

[Single Item] Here too we have only a single item, in this case asking how much one agrees or disagrees that “this country would be better off if we just stayed home and did not concern ourselves with problems in other areas of the world.”

- *Multilateralism*

Two of this index’s ingredients are the differences between the strength with which the respondent supports or opposes American military action “with United Nations support” versus “acting alone” to “prevent mass killings in foreign countries” and to “prevent the spread of weapons of mass destruction to countries that might use them.” These differences then averaged with the responses to questions asking how strongly the respondent agrees or disagrees that “the only way to solve environmental problems like global warming is through international agreements, requiring countries to work together;” how important it is to “work with other countries to identify and combat terrorism”; whether it is best to “work with groups of countries through international institutions like the World Trade Organization,” “to work with other countries one by one to establish agreements,” or “to leave things as they are” in dealing with international trade; and whether “the U.S. acting by itself,” “the U.S. acting with close allies like NATO,” “the U.S. & its close allies acting through the United Nations,” “the United Nations,” or “nobody” should “take the lead” in “trying to resolve international conflicts” and in “providing foreign assistance to other countries.”[i] Cronbach’s Alpha is .63 face-to-face and .75 online. // [i] Nobody’s taking the lead, chosen by only a few percent anyway, is treated as missing data.

- *Promoting Democracy*

This index averages items asking whether the respondent agrees more that “the U.S. should be promoting democracy in other countries” or that “how other countries are governed is not our concern,” the priority that should be given to “helping newly democratic countries develop their democratic institutions” as a reason for “provid[ing] foreign aid to other countries,” and the pre-average of the importance that should be

This variable specifically concerns foreign aid for food, medicine, and the alleviation of poverty. The index averages the priorities given to “providing food and medical help to poor countries” and “reducing world poverty” as “long range foreign policy goal[s],” and then pre-averages (a) the priorities given to “reducing hunger and disease in poor countries” and “helping poor countries develop their economies” as reasons for “provid[ing] foreign aid to other countries” and (b) the responses to questions asking whether the U.S., “as a global leader,” should spend more money to help fight world hunger in developing countries” and “to help fight the AIDS epidemic in developing countries” versus “concentrat[ing] on dealing with problems at home first.” Cronbach’s Alpha is .84 face-to-face and .82 online.

This is a single item asking what priority should be given to “protecting human rights in other countries.”

[Single Item] This is a single item asking whether the U.S. should “repeal the North American Free Trade Agreement, called NAFTA,” “leave NAFTA the way it is,” “adopt agreements like NAFTA but with more Latin American countries.”

Number of Indices: 9

- [Single Item] Some people think the federal government should lower taxes, even if that means providing fewer services like health care and education. Suppose these people are at one end of a scale, at point 1. Other people think the federal government

should provide more services like health care and education, even if even that means raising taxes. Suppose these people are at the other end, at point 7. People who are exactly in the middle are at point 4, and of course other people have positions at points 2, 3, 5, or 6. Where would you place yourself on this scale, or haven't you thought much about this?

- *Multilateralism (intervene with UN approval)*

[Single Item] Here's the next issue. Some people feel the United States should intervene militarily when its interests are threatened without working through international organizations such as the U.N and NATO. Suppose these people are at point 1. Other people feel that we should not intervene without first obtaining international approval and cooperation. Suppose these people are at point 7. Using the scale shown below, where would you place yourself, or haven't you thought much about this?

- *Free trade vs. Protectionism*

[Single Item] Here's the next one. Some people feel that we should pursue free trade even if that means some current American jobs are lost to companies abroad. Other people feel that we should protect American industries even if that means we lose markets for our goods abroad. And of course, other people fall somewhere in between. Where would you place yourself on this issue, or haven't you thought much about this?

- *Constitutional rights vs. Find every potential terrorist*

[Single Item] When it comes to protecting the country from terrorism, some people say it is important to ensure people's constitutional rights, even if it means that some suspected terrorists aren't found. Suppose these people are at point 1. Others say it is important to find every potential terrorist, even if some innocent people are falsely accused, interrogated, or imprisoned. Suppose these people are at point 7. Where would you place yourself on this scale, or haven't you thought much about this?

- *Health insurance: Govt vs. Private*

[Single Item] Some people feel that the federal government should make sure that everyone has adequate health insurance. Suppose these people are at one end of a scale, at point 1. Other people feel that health insurance should be left up to individuals and their employers. Suppose these people are at point 7. Where would you place yourself on this scale, or haven't you thought much about this?

- *Gay marriage: Allow marriage vs. Constitutional amendment to ban gay marriage*

[Single Item] Finally, some people believe that two people of the same sex should be able to marry just like anyone else. Suppose these people are at point 1. Other people think there should be a constitutional amendment to prohibit gay marriage. Suppose these people are at point 7. Where would you place yourself on this scale, or haven't you thought much about this?

Number of Indices: X

- *Ed-Reform*
[Single Item] "In order to improve public education in America, some people think the focus should be on reforming the existing public school system. Others believe the focus should be on finding an alternative to the existing public school system. Which approach do you think is preferable? (0 = Finding an alternative system; 1 = Reforming the existing system)"
- *Ed-CharterSch/Vouchers*
"Fund more charter schools with money from the public school system (1=Strongly agree); "Provide vouchers to pay some or all of the cost of private schools with money from the public school system (1=Strongly agree)"
- *Ed-Tax Money to Pub Sch*
"Provide more money for the most troubled public schools even if this means raising taxes (1=Strongly support); "Provide more money for public schools to pay for smaller class sizes even if this means raising taxes (1=Strongly support); "Provide more money for public schools to pay for new technology even if this means raising taxes (1=Strongly support); "Provide more money for public schools to pay teachers even if this means raising taxes (1=Strongly support); "How important would you say it is that the nation's schools focus on improving the following?: Funding (1=Extremely important)"
- *Ed-Std. Testing*
"In your opinion is there too much emphasis on standardized testing in the public schools in your community, about the right amount, or not enough emphasis? (0 = Too much, .5 = About the right amount, 1 = Not enough); "Some people think increased use of standardized tests in the public schools is good because it helps evaluate the performance of students and schools. Some people think it is bad because it forces teachers to emphasize only what is measured in the tests. Indicate whether you think it would be bad or good to increase the use of standardized tests in the public schools."
- *Ed-Testing Local/State*
[Single Item] "Some people think that tests for student achievement should be set at the state level and applied in the same way to all students in the state. Others think that local school boards should make these decisions in each community. Which do you think? (0 = Decisions about testing should be made at the state level; 1 = Decisions should be made by local school boards in each community)"
- *Ed-NCLB*

[Single Item] "From what you know or have heard about the No Child Left Behind Act, do you approve or disapprove of it or couldn't you say? (5-pt scale; 0 = strongly approve, 1 = strongly disapprove)"

- *Health-CostCov*

"The cost of health insurance (0=completely unimportant; 1=extremely important)";
 "The number of Americans without health insurance (0=completely unimportant; 1=extremely important)"; "The cost of prescription drugs (0=completely unimportant; 1=extremely important)"; "Would you be willing to pay more than you do now for health care if this meant that many more Americans would have health insurance coverage? (0 = No; .5 = Yes, at least slightly more; 1 = Yes, significantly more)"

- *Health-Government Involvement*

"The US should adopt a single-payer system, where a government entity accepts all healthcare fees and pays out all healthcare costs for everyone. (5-pt scale; 1 = strongly agree, 0 = strongly disagree)"; "The US should increase funding for Medicare and Medicaid even if this means increases in taxes. (5-pt scale; 1 = strongly agree, 0 = strongly disagree)"

- *Health-MedQuality*

"Medical errors or mistakes (0=completely unimportant; 1=extremely important)";
 "The medical malpractice system (0=completely unimportant; 1=extremely important)";
 "Quality of health care provided to those with insurance (0=completely unimportant; 1=extremely important)"

- *Health-EmployPayIns*

[Single Item] "The US should require employer coverage of health care, where every employer must provide insurance for all workers. (5-pt scale; 1 = strongly agree, 0 = strongly disagree)"

- *Health-IndivPayIns*

[Single Item] "The US should require individual coverage, where individuals must buy minimal coverage, perhaps funded by a tax credit. (5-pt scale; 1 = strongly agree, 0 = strongly disagree)"

San Mateo

Number of Indices: 7

- *Create more housing*

[Single Item] Some people think we should create more housing in the county. Suppose people who believe this are at one end of a scale, at point 1. Other people think we should restrict housing growth in the county. Suppose people who believe this are at the other end, at point 7. People who are exactly in the middle are at point 4, and of course other people are at points 2, 3, 5, or 6. Where would you place yourself on this scale, or haven't you thought much about this? (reverse coded)

- *Require some homes to be sold below market rate*

[Single Item] Some people think developers should be required to provide a certain portion of their homes at prices below the market rate. Suppose people who believe this are at one end of a scale, at point 1. Other people think developers should be allowed to sell homes at whatever price the market will support. Suppose people who believe this are at the other end, at point 7. People who are exactly in the middle are at point 4. Where would you place yourself on this scale, or haven't you thought much about this? (reverse coded)

- *Open space areas rezoned to allow housing*

[Single Item] Some people think that any new housing should be located in already developed areas. Suppose people who believe this are at one end of a scale, at point 1. Other people think that any new housing should be located in currently protected open space areas rezoned to allow housing developments. Suppose people who believe this are at the other end, at point 7. People who are exactly in the middle are at point 4, and of course other people are at points 2, 3, 5, or 6. Where would you place yourself on this scale, or haven't you thought much about this?

- *Attract jobs v. Restrict commuters*

[Single Item] If new housing is restricted, some people think we should still try to attract new jobs to the county, even if that increases the number of commuters. Suppose people who believe this are at one end of a scale, at point 1. Other people think we should try to minimize the number of commuters, even if that reduces job growth. Suppose people who believe this are at the other end, at point 7. People who are exactly in the middle are at point 4. Where would you place yourself on this scale, or haven't you thought much about this?

- *Increase public consultation*

[Single Item] On a scale of 0 to 10, where 0 is completely unimportant, 10 is extremely important, and 5 is exactly in the middle, how important would you say it is to increase public consultation in the planning and approval of new housing development?

- *Land use: Local control v. regional coordination within county*

[Single Item] Some people think local communities should retain control over land use. Suppose people who believe this are at one end of a scale, at point 1. Other people think land use policies should be coordinated countywide. Suppose people who believe this are at the other end, at point 7. People who are exactly in the middle are at point 4. Where would you place yourself on this scale, or haven't you thought much about this?

- *Housing issue: County level v. state-level*

[Single Item] Some people think housing is a county-level issue. Suppose people who believe this are at one end of a scale, at point 1. Other people think housing is a broader, state-level issue. Suppose people who believe this are at the other end, at point 7. People who are exactly in the middle are at point 4. Where would you place yourself on this scale, or haven't you thought much about this? (reverse coded)
