

## **NOTES for the Poll Inventory:**

### **Crime:**

- Number of Respondents Drawn is estimated from the known response rate
- Number of Callbacks: Interviewers were required to make a minimum of 3 callbacks, but were encouraged to attempt more if they were in the area (often 10 or more callbacks were made)
- Original version of the data is missing. Unable to verify the accuracy of the codebook. Unable to distinguish between different kinds of missing values.

### **1997 General Election**

- T<sub>3</sub> questionnaire only contains question about self-reported vote choice
- Number of Callbacks: Interviewers were required to make a minimum of 3 callbacks, but were encouraged to attempt more if they were in the area (often 10 or more callbacks were made)

### **The Future of Britain in Europe**

- Number of Callbacks: Interviewers were required to make a minimum of 3 callbacks, but were encouraged to attempt more if they were in the area (often 10 or more callbacks were made)

### **Monarchy (Queen and Country)**

- Number of Callbacks: Interviewers were required to make a minimum of 3 callbacks, but were encouraged to attempt more if they were in the area (often 10 or more callbacks were made)

### **National Health Service**

- Number of Callbacks: Interviewers were required to make a minimum of 3 callbacks, but were encouraged to attempt more if they were in the area (often 10 or more callbacks were made)

### **National Issues Convention**

- Number of Small Group Sessions: There were either 4 or 7 small group sessions depending on how you count. (The first three sessions were broken up into "A" and "B" parts with each part 2 hours long)

### **Australian Referendum**

- Although there were 356 participants in the Deliberative Poll, nine of them did not turn in T<sub>2</sub> questionnaires. Therefore, we have responses from 347 individuals.
- Sponsors: ABC; Channel 9; Social Opinions Australia; Sheppard Consulting Group; Old Parliament House; Peter Baker; Newspoll; The Australian newspaper; Issues Deliberation Australian; Australian National University; UT Center for Deliberative Polling; UT Australian Studies; Hawke Institute at Univ S. Australia; World Exchange; Rydges Hotels

- Due to a computer theft at the polling company, the data from a random selection of the interviews was lost. Therefore, we do not know how many individuals were in the initial sample. The 859 statistic is the number of interviews remaining.
